

Our Services

Evidence-based therapy for children and families — tailored to every child's unique needs.

Speech Therapy

Our licensed speech-language pathologists work with children experiencing articulation disorders, phonological delays, fluency challenges (stuttering), voice disorders, and apraxia of speech. We use play-based, motivating techniques to make each session engaging.

Ages served: 18 months and up.
Session length: 45–60 minutes.

Learn More

Language Development

We address both expressive language (how children communicate) and receptive language (how they understand). Services include vocabulary building, sentence structure, narrative skills, and augmentative & alternative communication (AAC) support.

Ages served: 12 months and up.
Session length: 2 hours

Learn More

Occupational Therapy

Our OTs help children develop fine motor skills, handwriting, sensory processing, self-care routines, and school readiness. We use a sensory integration framework and collaborate closely with families and teachers.

Ages served: Birth to 18 years.
Session length: 1 hour

Learn More

Feeding Therapy

Feeding challenges can be stressful for the whole family. Our specialists address oral motor delays, texture sensitivities, safe swallowing, and mealtime behavior using evidence-based approaches including the SOS Feeding Approach.

Ages served: Newborn and up.
Session length: 30 minutes
